The chart compares the mean of wages across different job categories for nonunion and union workers. The categories include:

- Professional/technical
- Managers/admin
- Sales
- Clerical/unskilled
- Craftsmen
- Operatives
- Transport
- Laborers

The x-axis represents the job categories, while the y-axis represents the mean of wage. The data shows a significant difference in wages between nonunion and union workers, with union workers generally having higher wages across all job categories.
